Employers and Job Opportunities

ICE recognises the fact that the UK economy is experiencing difficult financial times at the moment with limited opportunity for employment of civil engineering graduates.

As part of the strategy to offer assistance in this regard, the ICE has looked at the current situation in the UK and has provided some information we feel may help you.

Graduate Engineering Jobs

Whether you want to help prepare London for the 2012 Olympics, tackle waste management problems or help contribute to a new sustainable environment for the next generation, civil engineering can provide a successful career for you.

The Institution of Civil Engineers (ICE) Salary Survey 2010 showed that:

- The basic starting salary among those new graduates who left university in 2009 was £23,500
- On average the total income for under 25's was **£24,841** and for those aged 25-29 it stood at **£29,064**

So how do you find a job with the civil engineering industry? The ICE has provided a number of extremely useful graduate specific job sites and job search tips below to help you.
